Map of Europe's most valuable startups by country will surprise you

CHRIS O'BRIEN @OBRIEN OCTOBER 31, 2017 5:32 AM

Europe's tech scene is growing fast. And thanks to a new interactive map from PitchBook, we can see how the hottest company in each country compares.

The map uses data from PitchBook's Q3 [European VC Investment report](#).

Some of the names are familiar, including Spotify in Sweden and Deliveroo in the U.K. Indeed, Spotify tops all European startups with an \$8.84 billion valuation.

But others are certainly less well known, like Auto1 Group in Germany, worth \$3.26 billion based on its latest funding round, or Future Finance in Ireland, worth \$236 million.
